Who WE ARE?

A Strong Past
A Strong Future

Durum Group, established in 1985 on the foundations of a long-standing business tradition, is a corporate group that has developed a strong brand portfolio by operating across various sectors over the years.

Combining the **trust, stability, and experience** inherited from the past with a modern business approach, Durum Group places **quality, sustainability, and customer satisfaction** at the heart of all its activities.

Our journey, which began with the **supply of building materials,** has evolved over the years through the knowledge and sectoral experience we have gained, growing with our experience in **construction, ready-mix concrete production, and investments across different sectors.** We see each new investment as a natural continuation of our **experience and understanding of trust,** built over many years.

Today, under the **Durum Group umbrella**, we offer comprehensive solutions to our customers through our brands and subsidiaries operating in various sectors, particularly **Durum İnşaat, Durum Yapı, and Durum Beton.** While always putting **quality, trust, honesty, and professionalism** at the center of our business, we continue to move forward with the same vision and values.

With our **strong organization, experienced team, and innovative approach,** we aim for **sustainable growth** in every sector in which we operate; we strive to create investments that meet not only today's needs but also the expectations of the future.

As Durum Group, our goal is to **add value to our country through trusted brands, build long-term business partnerships, and leave a strong corporate legacy for future generations.**
